28. Description of Change: (use additional Sheets if necessary) The Capabilities to Features Mapping database baseline needs to be updated to match the working database configuration. A compare was run between the baseline and the working database, resulting in the differences documented in the table attached as page 2. The CCR change table (page 3) was prepared on the basis of the compare.						
29. Proposed Solution: (use additional sheets if necessary) As shown on the attached change table, delete 30 mappings from the baseline because there is no matching capability; delete 10 mappings because there are no matching features, and move 3 new mappings from the working version into the baseline.						
30. Alternate Solution: (use additional sheets if necessary)						
31. Consequences if Change(s) are not approved: (use additional sheets if necessary) Mappings are used for many activities related to scheduling, testing and delivery of the system. Incorrect mappings could impact deliveries.
